SUMMARY

I am a graduate of Multimedia Nusantara University with a strong enthusiasm for learning and embracing new challenges. I bring approximately three years of experience in the field of Full stack Development, including hands-on experience gained during my academic years. I am proficient in various programming languages and frameworks, including HTML, CSS, PHP, Laravel, Vue.js, Next.js, React.js, Tailwind CSS, Bootstrap CSS, Python, and MySQL. In addition to software development, I have a strong interest in computer hardware and practical experience working as an IT Support, including hardware and software troubleshooting. I also have a keen interest in design and regularly create application prototypes using Figma. I am seeking a full-time opportunity where I can further develop my skills as a Full stack Developer and/or IT Support professional while contributing effectively to the organization in a full-time work program.
